Ichigo Supports TCFD Recommendations

Ichigo decided today to support the recommendations provided by the TCFD (“Task Force on Climate-Related Financial Disclosures”), a task force established by the Financial Stability Board (“FSB”) in December 2015, at the request of the G20, to develop a framework on climate-related financial risk disclosures and how the financial sector can address climate change.

As a Japanese sustainable infrastructure company dedicated to making the world more sustainable, Ichigo has been growing its real estate and clean energy businesses to further contribute to a sustainable society. Its Sustainable Real Estate business preserves and improves real estate, lengthening buildings’ useful lives beyond 100 years, and its Clean Energy business makes productive use of idle land to produce renewable energy.

Ichigo believes that it is a responsibility of companies to work towards addressing the global problem of climate change. Ichigo has made sustainability a key business and social priority, and will work towards creating a sustainable future by identifying climate-related risks and establishing appropriate risk management procedures while also identifying new business opportunities that can help solve the problem.

Please refer to our website for our disclosure on governance, strategy, risk management, and metrics and targets in line with the TCFD framework.
