1. Reason for issuance of the stock acquisition rights as stock options

- The Company is striving to improve its revenue structure and financial base in order to grow its business. The Company is thus issuing stock acquisition rights to improve performance and morale of employees of the Company by aligning their interests with the Company’s shareholders.

2. Details of the Stock Acquisition Rights

1. Class and number of shares to be issued or transferred upon exercise of Stock Acquisition Rights

Such adjustment shall be made only with respect to the number of shares to be issued upon exercise of the stock acquisition rights not yet exercised at the time of such adjustment and any number of shares less than one share resulting from such adjustment shall be disregarded.

Number of shares after adjustment = Number of shares before adjustment x Split ratio

(or consolidation ratio)

2. Number of Stock Acquisition Rights to be issued

3. Issue price of the Stock Acquisition Rights
 - Free of charge
4. Amount to be paid in upon exercise of stock acquisition rights

 - The Exercise Price shall be ¥13,381, net assets per share as the end of May 2009.
 - If the amount is less than the closing price of the shares of common stock of the Company on the day before the day of issuance of the stock acquisition rights (if there is no closing price on such day, on the day immediately preceding such day), the Exercise Price shall be the closing price on the day of issuance of the stock acquisition rights.
 - Provided that when the Company makes stock splits or stock consolidations after issuance of the stock acquisition rights, the Exercise Price shall be adjusted in accordance with the following formula and rounded up to the nearest one (1) yen.

$$\begin{array}{lcl} \text{Exercise price} & = & \text{Exercise price} \\ \text{after adjustment} & & \text{before adjustment} \end{array} \times \frac{1}{\begin{array}{c} \text{Ratio of split} \\ \text{(or consolidation ratio)} \end{array}}$$

- Provided, further, that in the event of any issuance by the Company of new shares or any disposition of its own shares of Common Stock at a price less than the market price thereof (excluding issuance or disposition as a result of exercise of the stock acquisition rights), the Exercise Price shall be adjusted in accordance with the following formula and rounded up to the nearest one (1) yen.

$$\begin{array}{lcl} \text{Exercise price} & = & \text{Exercise price} \\ \text{after adjustment} & & \text{before adjustment} \end{array} \times \frac{\begin{array}{c} \text{Number of shares} \\ \text{outstanding} \end{array} + \frac{\begin{array}{c} \text{Increase in number of shares} \\ \text{as a result of new issue} \end{array} \times \begin{array}{c} \text{Issue price} \\ \text{per share} \end{array}}{\begin{array}{c} \text{Market price per share before new issue} \\ \text{Number of shares outstanding} + \text{Increase in number of shares as a result of new issue} \end{array}}$$
