Explanation

August's power generation was 1,317,000 kWh, 11% less than the plan of 1,175,943 kWh. The month-on-month decrease was due to the fall in production at power plants in the Shikoku and Chugoku regions, owing to bad weather conditions. Power generation in H1 totaled 8,030,839 kWh, 7% above the plan of 7,539,000 kWh. Forecast power production for September is 1,102,000 kWh.

Detailed production data for each Ichigo solar power plant is available on the website of Ichigo ECO Energy: www.ichigo-holdings.co.jp/eco/english/
