### Explanation

October's power generation was 1,245,766 kWh, 8% above the forecast P50\* power production of 1,156,000 kWh. Production start of the Ichigo Nakashibetsu Midorigaoka Power Plant on November 4 will increase power generation, so the P50 forecast for November is 1,017,000 kWh.

\* P50 is a third-party, 50% probability mean annual production forecast that serves as the base forecast for each solar power plant's operating plan.

CO2 reduction is calculated as 0.66kg CO2 per kWh.

Detailed production data for each Ichigo solar power plant is available on the website of Ichigo ECO Energy: [www.ichigo-holdings.co.jp/eco/english/](http://www.ichigo-holdings.co.jp/eco/english/)
